

Slewing crane SSK-2-6/500

Product

Product code:

SSK-2-6/500

Product info

Description

Slewing Cranes – Affordable & Flexible A cost-efficient solution for circular work areas, available in pillar- or wall-mounted versions. Jib with one or two rails, height customized to your needs.

Standard: 500 kg capacity, 6 m jib, 3800 mm height, 210° slewing range. Options: 4-5 m jib, slewing up to 270°, intermediate or chemical dowel plates.

Concrete requirements:

The base must be solid concrete with a minimum quality of C25/30 (max. C50/60). Minimum thickness: 150 mm (M12 anchors) or 180 mm (M16 anchors). The concrete must be single-layered, with no additional surface layers (e.g. screed, tiles, coatings).
